## The Annual Burns' Night Concert and Dance

under the auspices of the Chinook and District Agricultural Society will be held in the School Hall Chinook, Jan. 29th

Concert starts at 8 p.m.

A good program is being prepared which will include an address on Robert Burns by a Scotchman.

The Local Orchestra can be depended upon to supply peppy music for the dance. See bills for further particulars.

## Travellers!

Call in and let's get acquainted. We respectfully solicit your patronage

CHINOOK HOTEL

## Celebrate Diamond Jubilee

An event of unusual interest took place on Christmas Day and the day following it, when four generations gathered to celebrate the diamond anniversary of Mr. and Mrs. C. E. Woodruff, of Spadina avenue, Chilliwack, B.C.

On Christmas Day the celebration took the form of a dinner served at the home of Mr. and Mrs. W. H. Siddall, Yarrow, when over thirty members of the family were present. Guests for the day included the Rev. and Mrs. J. P. Westman of Vancouver, and old friends of the family for the past twenty-five years. The table was appropriately decorated for the occasion, centered with the wedding cake and also displayed several massive bouquets of chrysanthemums, the gifts of relatives and friends.

After the dinner the formal ceremonies took place. In the absence of the eldest son, Stanley, who lives in California, Mr. E. C. Woodruff, of Saskatoon, the second, took charge, and in words both reminiscent and humorous congratulated his parents on behalf of the family, while Mrs. Haley, the eldest daughter, presented the elderly couple with a well filled purse.

Mr. Woodruff, who despite the many years still possesses all his faculties to a marvellous degree, fittingly replied and the family were enlightened to some inner secrets never before revealed.

Telegrams of congratulations were read from different parts of Canada.

On Saturday afternoon and evening a reception took place at the home of Mr. and Mrs. Woodruff in Chilliwack. The interior of the home was tastefully decorated with flowers, among which were bouquets of large chrysanthemums from the women of the United Church at Chilliwack and from the Rev. J. P. and Mrs. Westman, of Vancouver. The table was centred with a three-tiered wedding cake surrounded by white edged holly and topped by two ivory candles. Tea was poured by Mrs. K. Haley, of Vancouver, and Mrs. Ferguson, of Chilliwack. Miss Vivian Siddall, Miss Ruby Ferguson and Mrs. Hugh Ferguson, grandchildren, served.

The bride and groom of sixty years ago were assisted in receiving by members of the family.

The happy couple were married in Creemore, Ont., where they lived for ten years. They went to Manitoba where they pioneered. In 1906 they came to Vancouver where they were active members in the then Mt. Pleasant Methodist Church. From there they moved to Chilliwack where they have lived for the past seventeen years.

During all these years the Woodruff home has been noted for its hospitality. Two sons and three daughters live today to pay honour to those who have given their best to the family.

Mr. Woodruff is now 82, and is active in both mind and body. Mrs. Woodruff, who is four years younger, is not quite so active, but still takes care of the home and is as cheerful as ever. Their friends state that they have been a blessing in every community where they have resided.

(Mr. and Mrs. Woodruff lived here for a short time a number of years ago. Mr. Woodruff is father of S. W. Woodruff who for some years was hardware merchant in Chinook.)

## Fred Otto Elected by a majority of one vote

A. Rosenau and G. McDonald Returned by Acclamation

The annual meeting of the ratepayers of Chinook Consolidated S.D. was held in the school on Saturday, January 9th, at 2 p.m.

Gilbertson—Rideout—That A. L. Robinson be chairman of the meeting.

Lawrence—Martens—That nominations for chairman be closed.

Mr. Robinson acted as chairman, and L. Proudfoot as secretary.

Minutes of last annual meeting were read.

Rideout—Gilbertson—That these minutes be adopted as read. Carried.

The teachers reports were given by the principal, E. V. Elford, and other reports by Lorne Proudfoot, secretary-treasurer.

Otto—Isbister—That the Inspectors' reports be read in full. Carried.

Nominations were now called for the position of trustee for Bison, Popular and Buffalo Plains school districts.

Rideout—Lee—That A. L. Robinson be trustee for Bison S.D. Nebb—Isbister—That Fred Otto be trustee for Bison S.D.

Young—Neufeld—That A. Rosenau be trustee for Buffalo S.D.

Martens—Dressel—That G. McDonald be trustee for Popular S.D.

The chairman declared A. Rosenau, elected for Buffalo S.D. and Gen. McDonald for Popular S.D., also the poll open for the election of trustee for the Bison S.D.

Poll remained open for two hours.

Ballots counted, 59 in all; result, Fred Otto, 28; A. L. Robinson, 26; 5 spoilt ballots which if counted according to the intention of the voters, the result would be Fred Otto, 30; A. L. Robinson, 29.

Fred Otto elected for S.D.

Signed, Lorne Proudfoot, Secretary.

The first meeting of the Board of Trustees of Chinook Consolidated S.D. for the year 1932 was held in the school on Saturday evening, January 9, at 8 o'clock.

All the members present.

Hille—That Fred Otto be chairman of the Board.

Otto—That Mr. Rosenau be chairman.

Johnston—That H. O. Hille be chairman.

Messrs. Hille, Rosenau and McDonald withdrew leaving Fred Otto elected as chairman for 1932.

Then followed the minutes of last meeting.

McDonald—That these minutes be adopted as read. Carried.

The correspondence was then read, also the bills presented for payment as also applications for van driving.

H. O. Hille—That payment of the following bills be paid:

Thos. Gilbertson, carpenter work 90c, F. E. Osborne, liquid slating \$7.95, R. D. Vanhook, draying \$27.65, Acadia Produce,

- Viking Coffee, per lb. - 39c
- Choice Peaches, 2 tins - 45c
- Evaporated Apples, 2 3-4 lb. packages, 45c
- Our choice bulk tea, lb., 39c
- Our special bulk coffee, 25c

on account \$1.25, Imperial Lumber Co., 35c, Banner Hardware, \$128 30, Service garage \$17 00, Dept. Prov. Sec., hall license \$1, C. W. Rideout, stamps \$10, W. E. Bennett, conveyance \$79, E. V. Elford, Christmas tree, \$250, Robinson Bros., blacksmithing \$16.

McDonald—That debenture payment of \$1,065.06 due Jan. 15th at the Royal Bank, Cereal, be paid. Carried.

Hille—That Lorne Proudfoot be engaged as secretary-treasurer at the same salary, namely \$300 per year. Carried.

Rosenau—That L. S. Dawson be assessor at \$25 per year, the same as last year. Carried.

McDonald—That the Royal Bank, Cereal, be authorized to accept the signatures of Fred Otto, as chairman, and Lorne Proudfoot, as sec.-treas., of the school district, and that a resolution in the same form as that of January 11th, 1930, be adopted. Carried.

Hille—That the following be the estimates for the year:

Expenditures  
Teachers' salaries \$4,900.00  
Officials' salaries 335.00

Debenture payment 1,065.00  
Van driving 6,500.00  
Grounds and buildings 300.00  
Supplies and equipment 400.00  
Fuel 450.00  
Cartaking 950.00  
Other expenditures 1,000.00

Total 15,900.00

Rosenau—That the tax rate for the year be 27 mills on the dollar, the same as last year. Carried.

Rosenau—That a discount of 5 per cent be allowed on all current taxes paid before June 15th. Carried.

Hille—That in order to deal with any matter of an emergent nature in connection with any van driving the following committee be appointed:

For Route 1 and 2, George McDonald; routes 3 and 4, Aug. Rosenau; routes 5 and 6, Glen Johnston; route 7, H. O. Hille.

Rosenau—That the following additional arrangements be made with regard to van driving:

Route 1, O. O'Malley, January 15th to February 15th; route 2, A. Marr, February 1st to February 15th.

## Disarmament,—Or War?

In the month of February, 1932, there will be convened a great conference of all nations to deliberate upon the problem of how to bring about world disarmament. It will be one of the most representative conferences ever held, while its decisions will be of the most momentous character, fraught with tremendous good or ill for all peoples.

A cynic may be inclined to inquire as to the necessity for a disarmament conference in view of the fact that in 1914-1918 a great war was fought with the declared object of ending all further war. The nations which avowed this to be their object won that war. Having won, why the continued necessity for huge armaments; why the necessity for a solemn convocation of the nations to endeavour to bring about disarmament?

The truth is: War will never be ended by war. The Great War 1914-1918 was not the first one to be fought to prevent future war. We read in the works of Mr. James Branch Cabell, an avowed student of the history and customs of the South of France, of how the Duc de Puyssange in the year 1697 addressed his ten-year-old son in these words:

"Now that we have almost reached the eighteenth century, and all the nations have signed that treaty of Ryswick to prevent there ever being any more wars, and people are riding about peaceably in sedan chairs, and are living in America," etc., etc.

Yet how many wars have been fought since 1697 although even then there was a treaty signed by "all" nations to prevent war?

Following the Great War 1914-1918, the nations set up a League of Nations having as its main purpose the prevention of war. Notwithstanding that two of the greatest nations in the world refused to become members of the League, it has accomplished much, but not enough. Then followed the treaty of Locarno, the Washington conference which achieved a measure of limitation of naval armaments, and finally the Kellogg Peace Pact, signed by practically every nation, declaring war an outlaw and solemnly pledged themselves, each to the others, never to resort to war as an instrument of national policy against any other nation.

And yet, the nations continue to be armed camps. The so-called peace-time armies of today out-number those maintained prior to 1914. War instruments and machines of destruction not only possess the land and sail the seas, but they dive under the seas and fly over the land. In a machine-guns, armies, navies and air armadas have become highly mechanized, hastening in less than moments of destruction and horrors of suffering previously unsurpassed in man's imagination.

At a time when millions of men are out of productive employment, when want and suffering stalks through hundreds of thousands of homes, when practically every nation is plunging deeper and deeper into debt, billions of dollars are being spent annually to increase and strengthen these huge war machines. Nor is it the semi-civilized, the least intelligent, the non-Christian nations which are the leaders in these insane and criminal acts, thus forcing civilized and Christian peoples to prepare to defend themselves. No, it is the nations which boast of their higher civilization and call themselves Christians who are setting the pace in preparing for another war.

Soviet Russia, which claims it is setting an example to the whole world in the development of a new order, a better way in which mankind should live, is one of the most offenders, with its government compelling the people to learn all the arts of war hand in hand with the arts of peace. The United States, far removed and immune from the century old suspicions, jealousies and hatreds of Europe, and safe from attack, leads the van in demanding a huge navy and in the maintenance of a large standing army. France remains armed to the teeth, with Italy a close second. Great Britain has gone far further than any nation in reducing armaments and is prepared to go much farther, prepared to go the limit in fact, if other countries will do likewise.

The hope of the world lies in the success of the forthcoming disarmament conference. War will not end war; rather each war but precipitates another. Disarmament alone will prevent war; it is the sole preventive measure, and in this case prevention alone will provide the cure. Give a boy a rifle and he will not be happy or content until he uses it. Give a nation a huge army, a powerful navy, airships and submarines, and as sure as night follows the day, it will, sooner or later, make use of them.

The hopes, the prayers, every ounce of influence possessed by each and every individual should be directed to making the forthcoming conference a success, wholly and completely so. Then, indeed, will a new day dawn for all nations and peoples.

## Dominion Checker Tournament

To Be Held In Regina Commencing February 8th

The Canadian Checker Association is holding the Annual Dominion Checker Tournament at Regina, Sask., for the week commencing February 8th, 1932. A cordial invitation to attend is extended to anyone interested. The committee hopes to make this a real tournament. Further particulars may be obtained from J. E. Watson, 974 Athol St., Regina.

## How Many?

"Now, boys," said the school teacher, "is there any question you would like to ask me about long measure before I pass on to the next class?" "Yes, sir," said Jimmy Jones, "How many policemen's feet does it take to make a Scotland Yard?"

"Do Fish Ever Sleep?" asks a scientific article. Well they ought to with all the free river, lake, and ocean beds.—B'nai B'rith Messenger.

## Sharp Pains In His Heart Nerves In Bad Condition

Mr. Fred J. Chase, Thomson Station, N.S., writes:—"I have used Milburn's Heart and Nerve Pills with wonderful results. My heart would beat so fast I would have to sit down when at work chopping in the woods. I had sharp pains in my heart when I would lie down at night."

My nerves were also in a very bad condition, but after using two boxes of Milburn's Heart and Nerve Pills I feel just fine, and am fourteen pounds heavier than I have been for years."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## Canadian Grown Bulbs

Considerable Quantities Now Being Exported From British Columbia

For many years Holland has been practically the sole source of supply for Canada of flowering bulbs, such as tulips, hyacinths, daffodils and the many other varieties that bloom in the spring. The monopoly of this business, enjoyed so long by Holland is already being affected by Canadian-grown bulbs. In recent years the bulb industry has developed substantially on Vancouver Island and in the Fraser Valley, British Columbia; so much so that it has now grown to such a point that considerable quantities are being exported.

A recent statistical survey placed the bulb acreage and production for the year in the two districts mentioned as follows: narcissi, 84 acres and 9,989,900 bulbs; early tulips, seven acres and 628,550 bulbs; Darwin tulips, 22 acres and 1,924,350 bulbs; gladioli, 68 acres and 5,899,500 bulbs; iris, eight acres and 500,000 bulbs; other bulbs, including lilies, dahlias, crocuses, 15 acres and about 500,000 bulbs. The bulbs grown in British Columbia are first class in size and quality and the equal of the best imported.

## 3 MONTHS OFF WITH NEURITIS

"I suffered awful pain for two years with Neuritis and Sciatica, and was off work for three months' time. After trying everything I could think of without getting any benefit at all, I tried a bottle of Krusen's Salt. After my second bottle, I felt much better again, and I am very glad to tell you I am still working, and I am quite free from any pain whatever."

The pains of Neuritis and Sciatica are a symptom of deeper trouble—the same trouble that causes rheumatism, gout and lumbago. They are a sign of an impure blood-stream. They show that poisons have crept into your blood. Krusen's Salt is a combination of six natural salts, which ensure internal cleanliness and keep the blood-stream pure. New and refreshed blood is sent coursing to every fibre of your being. Neuritis, Sciatica and kindred ills all pass away by Depression and lassitude vanish like mist before the sun.

## The Modern Newspaper

Service That It Not Surpassed By Any Other Agency

When people read their newspapers, purchased for a few cents, they seldom stop to think of the enormous expenditures necessary for equipment and other services, in order to present them with the latest and most trustworthy dispatches.

The intricate system of gathering news covers the entire world, and no expense is spared in keeping the public informed. Then, when it is conveyed to the individual newspaper office it requires heavy expenditures for the latest mechanical devices so that it may be quickly published and distributed to the readers.

Truly, the modern newspaper service is not surpassed by any other agency in enterprise, accuracy and dispatch.—Brantford Examiner.

## Guarding Marriage Rites

Increasing Laxity On Subject Of Marriage Is Noted

The Archbishop of Canterbury, commenting on what he described as the "increasing laxity on the subject of marriage" in the Church of England, has enjoined the clergy to exercise care in authorizing marriage ceremonies and outlined a series of questions to be answered by couples before banns are published.

Clergymen, he said, should solemnize no marriage for "any person who had previously been married and divorced; if the former husband or wife is still alive." Neither, he said, should they marry any one who has not been baptized.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early, will prevent incipient condition from becoming chronic and saves hours of awful suffering.

## "Elephants" In Quake Area

Sufferers in the earthquake area of New Zealand received messages of condolence from all parts of the world, but the one that brought the greatest smile was from a soap company in Dayton, Ohio, to a Napier firm, saying: "We are certainly sorry to learn that your plant and buildings have been destroyed by the elephants."

Nearly 250 exhibits were displayed at this year's ideal home exhibition in Glasgow, Scotland.

W. N. U. 1924

## Aberdeen-Angus Directors

Directors For 1932 Of Canadian Association Are Announced

Directors of the Canadian Aberdeen-Angus Association for 1932, elected by mail vote, were announced by F. W. Crawford, of Winnipeg, secretary. They are: For Ontario and eastern provinces, John A. Brown, Forrest, Ont.; and T. A. Edwards, Waterloo, Ont.; for Manitoba, Harry Lender, Burnside, and James Turner, Carroll; for Saskatchewan, W. J. F. Warren, Belbeck, and W. D. Lyon, Deveron; for Alberta and British Columbia, E. W. Jones, Calgary; S. J. Henderson, Lacombe, Alberta, and R. R. Buchanan, Pincher Creek, Alberta.

The president and vice-president of the association will be elected at the first meeting of the new directorate.

## Fewer British Vessels

Montreal Port Shows Falling Off In Vessels Entering Harbor In 1931

Fewer British vessels entered the port of Montreal during the navigation season of 1931, according to the report of the port warden. A total of 508 British vessels used the port, a decrease of 98 vessels from the previous season. Depressed trade conditions all over the world are reflected in Captain C. R. Brown's report, showing that the total number of overseas vessels to use the port decreased by 19, or by a tonnage of 332,550. A total of 796 overseas vessels of all registries docked here during the year, a tonnage of 3,995,293.

## Recipes For This Week

(By Betty Barclay)

### DEPRESSION DAINTIES

By Betty Barclay

Because Old Man Depression is still hanging around to annoy us does not mean that we are forced to go without a tasty dish or two a day. Here are two that may be prepared economically, and that will prove delicious:

### Pot Of Gold Dessert

Serves 4

½ cup sugar.  
¼ cup cornstarch.  
¼ teaspoon salt.  
1 cup milk.  
1 cup orange juice.  
2 tablespoons butter.  
Mix dry ingredients, add milk and sugar and cook in double boiler until thickened. Add butter. Pour into individual molds. Cool. Serve with milk or cream.

### Orange Canape

Individual Service

Peel oranges and slice in one-third inch slices. Allow 1 large or 2 small slices to a serving. Arrange on lettuce. Sprinkle with ½ tablespoon minced celery. Serve with French dressing. Garnish, if desired, with slices of stuffed olive or with small strips of pimiento.

Persian Palm is a true elixir of youth. Refreshes and rejuvenates. Adds a youthful charm to the complexion. Softens and beautifies the skin. Makes hands divinely white. Indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. Soothes dry and irritated skin. Corrects and preserves. A flawless toilet requisite for every discerning woman. A true aid to beauty.

Grain Raising On Indian Reserves. Indians in the three Prairie Provinces of Canada had under cultivation in 1930 about 112,000 acres. The records of the Department of Indian Affairs also show that in the spring of that year these wards of the Government sowed 35,150 acres to wheat, 24,750 acres to oats, 5,442 acres to barley, 2,918 acres to rye, and had several hundred acres of gardens. They summer-fallowed approximately 32,273 acres.

### Too Many Middlemen

If the United States folk are disrespectful to the Canadian dollar, why should this country's business men import raw materials from abroad through agencies in that country? There are too many middlemen getting their "whack" before the ultimate consumer receives his goods. In planning to stop this business the minister of trade and commerce is on the right track.—Toronto Globe.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning. Splendid for muscular rheumatism.

Before the advent of the white man, Eskimo knives were made from native copper.

An evening school started a course in plumbing, and after the first lesson the class forgot to attend.

# MACDONALD'S

## Fine Cut

Canada's Finest Cigarette Tobacco with ZIG-ZAG papers attached

## Medical Expert Dies

University Of Alberta Professor Is Martyr To Science

Martyr to his science, Dr. H. M. Vangy, 36, professor of medical jurisprudence, and assistant pathologist at the University of Alberta, died here December 29, 1931.

He gained an enviable reputation as an expert in crime detection through medical science. Blood poisoning, as the result of a slight injury to his thumb while engaged in post-mortem work, caused death. He was investigating the circumstances surrounding the death of H. C. Larsen, murdered farmer at Consort, when he became ill on December 17.

He was a native of London, England, and a graduate of the University of Alberta.

## Short Paid Letters

Christmas Greetings From United States Lacked Necessary Stamps

So many United States citizens forgot to add an extra one cent stamp to the envelopes bearing their Christmas cards this season that no less than 725,000 letters from across the border arrived short paid in Toronto during the holiday rush.

To avoid a recurrence of the difficulty, Toronto authorities stated recently, Ottawa is making a request to Washington postal administration to make better known the fact that it takes three cents to carry a letter from the United States to Canada.

## Practical Stock Raising

Short Course Farm School May Be Established

Possibility of a new type of short course farm school in practical stock raising, conducted in conjunction with the Dominion experimental farms, was forecast by Hon. Robert Weir, Federal Minister of Agriculture.

While discussing the work being done now by the Federal Government under the bull loaning policy, Mr. Weir stated that he had in mind the establishment of short course schools on the experimental farms at such times as funds for such work might be available.

Such a course, he said, would give an opportunity to farm boys to go to one of the farms during the winter months, where he could get good practical training in stock breeding, where he could learn the value of good foundation stock.

## Educating Canada's Indians

A total of 356 centres of Indian educational activity in Canada, composed of 78 residential schools and 272 day schools, is reported for 1930 by the Department of Indian Affairs. The total enrolment was 15,743 and the average attendance, 11,579.

A yield of 75 bushels of Garnet wheat to an acre was obtained on a small area near Edmonton, Alberta.

## The Darling!

What a care he is, but how precious! Your whole life is centred in him... If he is to be well and happy, he must be strong and robust. Baby's Own Tablets help mothers to keep their children well. They are the ideal laxative for children—a simple and safe preventive, and a remedy for colds, simple fever, indigestion and constipation. They aid in relieving the distress which accompanies the cutting of teeth and generally promote the health and comfort of children.

25 cents a package at any drugist's.

# Scientists Have Hopes Of The Ultimate Development Of Radio Power Transmission

Scientists have high hopes for the ultimate development of radio power transmission. Even governments anticipate it. As fantastic as it may seem, other dreams of advancement in science have materialized after experts had discouraged their possibilities.

Lawrence M. Cockaday, New York University professor and noted radio engineer, told the Canadian Press "the beam systems of extremely short waves may yet open up the field of possibility and make feasible the transmission of larger powers along the airwave paths."

"In this eventuality," Mr. Cockaday continued, "power transmission could be used for great air carriers in flight. As well as ocean liners, battleships and moving vehicles. Even in this day it is possible to control these moving carriers by means of radio energy."

The latest development is the discovery of micro-waves, so small that they are measured in centimetres. Micro-waves permit a high degree of efficiency at receiving stations.

Further, concentration of the radio "beam" in one direction, also a late development, means a higher efficiency of power at the receiving end. Mr. Cockaday has been conducting investigations into the concentration of beams.

The future can easily be imagined. The initial source of energy would be huge power plants at natural water-power developments. These developments would transmit power to various cities and community centres to be redistributed within their domains.

Each community would have a retransmission station to distribute the energy categorically—domestic appliances, moving vehicles, etc.

The "beams" would be transmitted at various levels for different uses—one perhaps above house tops for domestic use, and another at a level where automobiles might pick up the power. To save loss of power, a receiving station at the far end of the city would pick up unused power, storing it for redistribution.

Applied to vessels at sea, the problem of diminishing fuel would no more trouble the captain. The course of the vessel might even be simplified, the power beam acting both as energizer and course-director. In the event of storms at sea, storage batteries would reserve enough energy to operate the vessel until it found the "beam" again.

Railroads would be revolutionized, and aeroplanes might utilize the two-fold advantage of the power "beam" as a course-director and energizer.

## Infantile Paralysis

New Cure Has Yet To Be Found By American Physicians

The medical profession, in United States at least, is still at a loss for facts concerning the cause or cure of infantile paralysis. It was agreed by physicians and scientists attending the twelfth annual meeting here of the Association for Research in Nervous and Mental Disease.

Even the convalescent serum, so generally advocated and administered during last summer's epidemic, is not yet proved effective; the most that can be said for it is that it does no harm, and most physicians believe in administering it on the theory that it is better to give the patient the benefit of the doubt as to its value, according to several experts.

Speaking of increased taxes, is it sporting to jump on an income when it's down?—New Britain Herald.

Irish harps are becoming so rare in Ireland that some were sold recently for \$500 each.

She: "When you were young, did your mother teach you the language of flowers?"  
He: "She called me 'Loot', 'Clumsy Fool' and 'Idiot', when I trod on her carnations."—Pages Gates, Yverdon.

W. N. U. 1924

## Decline In Educational Standard

President Of Dalhousie University Refers To School Problems

"There has been a decline in Canadian educational standards during the past few years," declared Carleton W. Stanley, president of Dalhousie University, in a year-end interview on education in general. "And this must be eliminated if Canada is to maintain that glorious democracy that has featured her educational system in the past."

Dalhousie's new president lauded the widespread systems of scholarships in British universities, stressed the need of greater development along similar lines in Canadian universities, and remarked that present-day students exhibited a gratifying interest in their work.

"The decline in educational standards," commented President Stanley, "is due to the swollen attendance at practically every university and high school in Canada, a problem that is becoming more acute every year. Understaffed for even such smaller attendance, this appalling increase means that institutions of learning are physically unable to do the work they were intended to do."

He said that, while educational authorities were quite frank about this matter among themselves, there seemed to be some unwillingness to discuss it openly, something that must be done very soon.

"The one direction in which we have grown away from democracy," he continued, "is that the cost of education has increased enormously. This is largely because of the increased attendance, and the consequent need for more buildings and for larger staffs, not through the increase of teachers' salaries, as many suppose. These have not nearly kept pace with the cost of living."

## Agree On Grain Quota

British Millers and Farmers Reach Agreement On Government Scheme

The London News Chronicle states that British millers, farmers and corn merchants have agreed to the government's scheme for a quota on wheat importations on condition that a duty be placed on flour imports with either preference or a quota in favor of Empire products.

The newspaper said further discussions on the wheat question were held and the three interested groups came to an agreement on the scheme which they claim will be acceptable to the government.

The News Chronicle said the machinery for the operation of the plan had been agreed upon also.

It is urged the adoption of a preference on flour from the Dominions removes the objections of Canadian flour exporters and at the same time satisfies the British farmer, who believes his feeding stuffs will be cheaper as a result of increased home production.

## International Wheat Movement

Movement Of Wheat And Flour Has Been Satisfactory

Considering the period from Aug. 1 to Dec. 17, the international movement of wheat and flour has been satisfactory, says a statement issued by the Dominion Bureau of Statistics. World shipments for the first 20 weeks of the present cereal year have amounted to 309,000,000 bushels, compared with 311,000,000 bushels for the corresponding period last year.

Considering existing tariffs against imported wheat, milling quotas and other restrictive measures in effect in continental European countries, as well as the availability of supplies of domestic wheat in importing countries, the international movement of wheat during the past four and one-half months has been an encouraging factor in the wheat situation. In spite of the many difficulties resulting from the present economic situation, surplus stocks of wheat are moving into consumption at a rapid rate.

## The Great Debt Illusion

If Germany defaults on her debts Great Britain is bound to follow. There is no use continuing this illusion of international debt and repatriation payments. If we don't end it we may have social upheavals in which more than reparations and international debts may go by the board.

A psychologist finds that white babies develop faster than negro babies.

## FASHION

No. 228—Smart Jacket Dress. This style is designed in sizes 10, 12, 14, 16, 18, 20 years, 36 and 38 inches bust measure. Size 36 requires 5½ yards of 39-inch material with 1 yard of 39-inch contrasting.

No. 708—Princess Slip. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 2½ yards of 35-inch material with 2 yards of binding.

No. 696—Canning Bolero Dress. This style is designed in sizes 4, 6, 8 and 10 years. Size 6 requires 1½ yards of 39-inch material for bolero and skirt with ¾ yard of 35-inch material for blouse and 2½ yards of binding.

No. 705—New Sports Type. This style is designed in sizes 8, 10, 12, 14 and 16 years. Size 12 requires 1½ yards of 35-inch material for skirt, collar and wristbands, and 1½ yards of 55-inch material for blouse, and 1½ yards of 5-inch ribbon.

No. 676—Darling Pajamas. This style is designed in sizes 12, 14, 16, 18, 20 years, 36 and 38 inches bust measure. Size 18 requires 3½ yards of 39-inch material with ¾ yard of 39-inch contrasting, and 1½ yards of 39-inch material for jacket.

## Control Of Trachoma

Regulations Expected To Be Inaugurated In Saskatchewan

Special regulations covering the control and prevention of trachoma in Saskatchewan are expected to be inaugurated in the near future, following approval of such action at a meeting of the provincial council on public health, held recently in the office of Dr. F. C. Middleton, Deputy Minister of Public Health at Regina.

Such regulations will be only part of wide changes to be made in regulations for the control and prevention of communicable diseases in the province. Present regulations in Saskatchewan states have not been revised since 1923.

## Reduction In Milk Price

Through agreement with the New England Milk Producers' Association the milk distributors of Boston have recently lowered their retail price to ten cents per quart, following reduction of a cent in the wholesale price for the second time in a week. This is the lowest price Boston has had to pay for its milk in the past 15 years.

## Heavy Insurance Business

Record Of Achievement For Insurance Companies Operating In Canada

Estimating increases in all main departments—ordinary, industrial and group—life insurance companies operating in Canada closed 1931 with a record of satisfactory achievement behind them.

It was not to be expected that business would equal the high levels of boom years, but during the past 12 months more than \$800,000,000 of new ordinary life insurance was written in Canada, and 1931 closed with total business in force of more than \$6,750,000,000 covering 7,000,000 policies.

During the year just closed \$100,000,000 was paid to policy holders and beneficiaries, an increase of 11 per cent over 1930, and of this nearly 70 per cent went to living policyholders.

While employment conditions were unsatisfactory during the year, industrial insurance was well maintained. In group insurance also total business will exceed that of 1930.

## NEW RAILWAY APPOINTMENTS

John MacMillan (left) retired as General Manager of the Canadian Pacific Railway Telegraphs Department on January 1st, after having been in the service since 1883, and General Manager since 1921. It is announced that W. D. Neil (right) is appointed General Manager of the Department of Communications of the Canadian Pacific Railway, with supervision over the system's telegraph, telephone and radio broadcasting services. Mr. Neil joined the company as an operator in 1905.

# Monster Project To Impound Waters Of North Country To Alleviate Drouth Conditions

Rushing streams of Canada's broad northland may be put to work in the west country's efforts to halt the ravages of drouth—most fearful destroyer of Canadian grain crops. Gigantic plans advanced for the consideration of two prairie governments involve formation of a barren-lands lake double the size of the Great Lakes, and development of the west's greatest power project within 150 miles of Winnipeg.

Moisture would be added to the prairies' prevailing northwest wind by the proposed flooding of a monster basin in the Northwest Territories. In Manitoba's 400,000 horsepower project, advanced by Premier John Bracken, the province's lakes would be made the storehouse for moisture for the fertile prairie plains in the south.

Three of the great rivers pouring into the Arctic Ocean and Hudson Bay would be harnessed if the two projects were put into force. The Mackenzie River, the St. Lawrence of the north, and the Coppermine would be dammed to form the new lake in the barrens; and the flow of the wandering Saskatchewan would be diverted if the Manitoba plan were brought into effect.

"The more information we obtain, the better the Manitoba project looks," stated C. H. Attwood, Deputy Minister of Mines and Natural Resources, commenting on the plan advanced by Premier Bracken. At the last session of the legislature, \$12,000 was set aside for investigation of the plan for storing the flood waters of the Saskatchewan and Manitoba's northern lakes.

At the present time, the Saskatchewan flows into the north end of Lake Winnipeg at Grand Rapids, about 75 miles southeast of The Pas. Under the Bracken plan, the river would be diverted south through lakes Winnipegosis and Manitoba, which parallel Lake Winnipeg on the west, and a powerful head of water would be obtained on the Dauphin River, flowing from Lake Manitoba to Lake Winnipeg.

"It has been pointed out that the water-table on the Portage Plains

would be higher if the lake levels were higher," Mr. Attwood explained. "Sloughs drying out in the south draw on the water-table. It is held and as a result the sum total of available growing moisture is diminished. Besides, higher levels are sought by fishermen, duck hunters and muskrat trappers."

Though no estimate has been made of the possible cost of the Bracken project, since full information is not available as yet, it is contended that the work would not involve a large outlay. A dam would be constructed at Grand Rapids and possibly a canal to shorten the course of the Dauphin River where the power plant would be located, but few other works are at present considered necessary.

Shipment of western coal by barge down the Saskatchewan River, which flows from the Rockies' foothills, is one of the possibilities envisaged in the Bracken plan. Once on the Manitoba lakes, the barge coal could be routed by means of canals and locks to the Red River and thence directly to Winnipeg. Enquiries regarding the project have been received at Winnipeg from governments of the other prairie provinces, from engineering firms and from municipal governments.

Rough details of the proposal to flood a great area in the northwest by damming the relatively narrow valleys of the north flowing Mackenzie and Coppermine Rivers have been outlined by G. T. Magwood, Herbert, Sask. They are in the hands of Hon. J. F. Bryant, Saskatchewan Minister of Public Works, in his capacity as chairman of a provincial commission on conservation and afforestation.

"Such a lake would flood country still unsettled, and that would involve no expense," reads Mr. Magwood's letter to the commission. "Water power in the Coppermine mineral region would be a source of revenue and the opening of a vast stretch of Cambrian shield mineral deposits would also be a reward. Such an inland lake would solve our drouth problem, for it would take moisture from the Pacific, at present blown out of the winds by the ridges of the Rockies, and scatter it over the prairies."

## Travel By Dog Team

In Northern Canada

Obtaining Suitable Feed For Dogs Always Presents Difficulties

One of the most difficult problems connected with winter travel in Canada's Far North is the supply of sufficient and suitable feed for the dogs according to the records of the North West Territories and Yukon Branch, Department of the Interior. If possible a supply of dried fish or meat or both should be secured before going into the North. Each dog should be apportioned a pound and a quarter of good oily fish per day when not working and two pounds a day during the winter or working months. If the fish or meat is dry or with little fat, per day and a half pounds of tallow per week for each dog should be provided in addition. Another advantage of bringing in the supply of dog feed from the "outside" is that radical changes of diet almost invariably impair the efficiency of the team. Should it be impossible to carry dog feed into the country the traveller will be well advised to accumulate dog feed at every opportunity which may present itself within the north country. In very few localities will the local supply more than meet the needs of the dog teams that will have to depend on it.

## Leap Year Gains

Extra Day Will Bring Added Revenue To Government

The year 1932 being a Leap Year, the Empire stands to gain several millions of pounds, the proceeds of the extra day—February 29. The Post Office will reap a harvest in stamps, telegrams and from the telephone service, while Customs and Excise will bring added funds to another Government Department. On the other hand, the housewife whose husband is paid monthly will be forced to give free board to her family on that day! This man or woman who takes time to business must need spend on fares and keep during the extra day. It is only the piece workers who seem to benefit by the additional day.

"So Robert married a social nobody; and just think, his ancestors came across in the Mayflower." "That's all right, her folks came across with half a million."

## Bacon Trade Poor

Big Drop In World Prices Is Given As Cause

The action of the Irish Free State Government in placing a protective tariff on bacon from which the various portions of the British Empire are exempt is taken at Ottawa as an encouraging gesture towards Empire trade. However, government experts see little probability of ever building up a trade in Ireland for Canadian bacon. Ireland is itself one of the world's most noted producers of bacon which tops the market in the United Kingdom.

The bacon trade is in a bad way at present. The prices are very low. Bacon is offered retail in Canada as low as 10 cents a pound when not so long ago it was 40 and 50 cents. The big drop in this country came when Canada started exporting. For several months this year the supply was no greater than needed to meet domestic supply and prices held up. Eventually there was a surplus and when the export business started, domestic prices tumbled to an equality with world prices.

## Raw Furs From Russia

Raw furs from Russia will, in future, be permitted to come into Canada. Dried, dressed or manufactured furs will still be kept out. This is the effect of an order-in-council made public. The banning of furs from Russia developed considerable opposition from furriers of Canada. Protests were made to the Government with a view to having the order-in-council amended so as to permit the entry of raw furs.

Mason: "I heard on the wireless last night that it was certain to rain today, so I propose that we leave off work before we get wet." (Motion carried unanimously.)—Sondagsnisse, Strix, Stockholm.

## CABINET POSTS AWAIT LIBERALS IN MANITOBA

Winnipeg, Man.—Premier John Bracken has promised cabinet representation to the Liberal Party after the next session of the legislature, in a letter to Dr. Murdoch MacKay, Provincial Liberal Leader. The letter was made public.

The premier said he was willing to give the Liberals more than one cabinet position, but did not indicate how many. At the same time he made it clear he was still holding the door wide open for a union government, representing all political groups in the House.

"While not impossible to do so," the letter states, "it is obviously difficult to make any reorganization of the government before the coming session."

"After the close of the session, however, if the Conservative and Labor parties have not accepted the invitation I extended to them, the strongest possible cabinet will be chosen and representation in it will be given to the Liberals of the province, additional to that proposed by me last September."

In first proposing formation of a union government in September, Premier Bracken planned to take one Liberal, one Laborite and two Conservatives into his cabinet. The Labor and Conservative groups turned down the offer.

If these parties reconsider their decisions and decide to join forces with the government, "the way is to be left open to do so," Mr. Bracken's letter states. In that event, reorganization of the cabinet would take place before the legislature session opens.

After the next general elections, likely to be held this summer, the premier says in his letter he will leave the question of leadership of the government—if his administration is returned—to its supporters.

"When the general election is over it is my purpose to ask that supporters of the administration shall choose who shall lead the government. I do this because I feel deeply that no private feeling or personal ambition should at this time receive any consideration."

### World Peace Menace

#### Armaments and Reparations Are Twin Difficulties

Vancouver, B.C.—The twin difficulties besetting world peace today came into being with the signing of the League of Nations covenant in 1918 and are "armaments" and "reparations," in the opinion of Dr. Rev. L. Ralph Sherman, D.D., Bishop of Calgary, expressed in an address to members of the Women's Canadian Club here.

The result of the excessive reparations demanded of Germany—financial breakdown—was seen by thinking economists, but such beliefs were not popular in 1918 when the Treaty of Versailles was signed.

#### Police Wound Suspects

Vancouver, B.C.—Two alleged burglars were wounded by Vancouver police bullets on city streets and eight other suspects were arrested. Police believe the arrests will clear up a number of burglaries and house breakings reported in the downtown and west end districts in the past few weeks.

#### American Plant For Quebec

Montreal, Que.—The M. E. Biz Company, of New Jersey, will establish a plant at Montmagny to make silk goods and will employ 150 workers. Strick Brothers Ribbon Manufacturing Corporation, of New York, will build a plant in the province to employ 250 persons.

#### Object To Lecture

Cardiff, Wales.—It has been reported to the agricultural committee of Glamorganshire that after lectures on horticulture had been delivered in the Cardiff and Swansea prisons, some of the prisoners protested to the governors that such lectures were not included in their sentences.

#### Writer Hit By Truck

Clarkson, Ont.—Sidney H. Preston, well known author, was struck by a truck while turning in his car on to the Hamilton Highway here, and is lying in a critical condition with concussion of the brain.

By means of a noise-meter, Pittsburgh officials have made tests to learn which down-town street crossings are noisiest.

W. N. U. 1924

### Storms In Europe

#### Resultant Floods Are the Cause of Six Deaths

London, England.—Storms from Portugal to Scandinavia and floods in many parts of Europe caused six deaths, and distress for several ships. The British steamer Jersey City sent urgent calls for help from a position near the Scilly Islands, saying it was out of control with its machinery broken down. A motor barge sank in the Thames estuary, but the crew of three was saved.

The Grecian steamer "Alexandria" grounded two miles off the coast in Dungeness Bay in the English Channel and later was refloated. A violent southwest gale delayed departure of the liner "Paris" from La Havre, France, three hours. A fishing boat sank in a fierce gale off the Breton coast, but the crew of two was saved.

The wind had reached a force of 80 miles an hour over some parts of Great Britain Wednesday night, January 6, while the Scilly Islands were lashed by a 93-mile gale. The battleship "Royal Sovereign" and the cruiser "Exeter" went to the assistance of the British freighter "Trevelyan," which had lost a propeller and was drifting in peril off Plymouth.

The tremendous gales were accompanied by rain storms which flooded much of England, Ireland and Wales, and forced suspension of quayside and other activities in many places. A boat belonging to H.M.S. Whirlwind was swamped at Sheerness and one seaman was lost.

The harbor at Lisbon, Portugal, was shrouded in dense fog and several accidents were reported.

The wind in London was so violent that a mail van was blown over on its side in the centre of the city. The weather bureau said the gale was one of several due to strike during the next few days.

From Prague, Czechoslovakia, came reports of floods that submerged many homes and resulted in one death.

Halberstadt, Germany, reported the deaths of three persons in floods in the surrounding territory.

Considerable property damage but no loss of life was suffered in the neighborhood of Bar-le-Duc, France, where the Marne and several other rivers were in flood.

### War On Bookmakers

#### Drastic Campaign Against Betting Anticipated In Winnipeg

Winnipeg, Man.—Winnipeg bookmakers are reported in for a hot time in the next few weeks. Following the arrest of two officials of the Provincial Treasury Department charged with embezzlement of more than \$100,000 and statements from the accused that they had lost money in race track gambling, provincial authorities are turning their attention to the activities of the bookies.

Police officials decline to discuss the matter, but a drastic campaign against betting is anticipated.

### Legislative Sitings

#### Saskatchewan House To Open On Thursday, February 4

Regina, Sask.—The fourth session of the seventh legislature of Saskatchewan will open on Thursday, February 4, according to official word received from Premier J. T. M. Anderson. On the same date the legislature of Alberta will open, and also the House of Commons at Ottawa. In view of this possibility of February 4 for opening legislative sittings, it is considered likely that Manitoba's House will also convene on that day, though official word to that effect is as yet lacking.

#### Friends Of Soviet Union

Saskatoon, Sask.—The Farmers' Unity League stated recently that delegates sent by it to Regina would shortly make lecture tours of Saskatchewan and Alberta. Carl Axelsson is to visit points in Northern Saskatchewan, L. P. McNamee will speak in the south and Miss Florence Boves will tour Alberta. They have been addressing meetings in Eastern Canada under the auspices of the "Friends of the Soviet Union."

#### Moslem Leader Dies

Lahore, India.—Sir Muhammad Shaif, noted Moslem leader and delegate to the recent Indian Round Table Conference at London, England, died here at the age of 62.

#### Royalty At Sandringham

London, England.—The King and Queen are expected to remain at Sandringham, Norfolk, where they spent the Christmas holidays, until the end of this month.

### For Imperial Trade

#### Australia Takes Strong Stand For Trade Within Empire

Canberra, Australia.—Through the medium of "talking pictures," Prime Minister Joseph Lyons declared the new Australian Government stands for the fullest measure of Imperial preferential trade with Great Britain and her sister Dominions. The Government would earnestly strive to make a success of the forthcoming Imperial Economic Conference at Ottawa, he added.

Mr. Lyons introduced the members of the new United Party before the cameras. The occasion was the gathering of the cabinet to formally take office.

Consideration of revised tariff schedules will be the first business of the new Australian Parliament when it assembles on February 17, it was announced after the first meeting of the new cabinet under the Prime Minister's leadership.

The first act of the United Party cabinet was to re-appoint Claude Dunlop to the board of directors of the Commonwealth Bank.

## DEBT ACCORD IS BEING SOUGHT BY THE BRITISH

London, England.—Indications that the British Government was seeking to form a united front with the French for the international reparations conference to be held at Lausanne appeared at a meeting of a cabinet sub-committee.

Contrary to expectations, Viscount Snowden of Icknesham, former Chancellor of the Exchequer, whose stand for British interests at The Hague reparations conference in 1922 made him a national hero, attended the meeting of the sub-committee on reparations.

Sir Frederick Leith-Ross, British treasury expert, who has acted as a link between the British and French Governments in discussions preliminary to the Lausanne conference, also attended.

Prime Minister Ramsay MacDonald cut short his vacation in Scotland and prepared to leave for London partly to negotiate with France over a date for the Lausanne. The British are pressing for either January 18 or 20, while the French have proposed that the conference be delayed until January 25.

### Room For Britishers

#### Door Still Open For Desirable Class With A Little Capital

Saint John, N.B.—The district conference of land settlement superintendents of the Maritime area with officials from Ottawa and Fredericton was in session here.

T. MacGladery, Ottawa, chairman of the Soldiers' Settlement Board of Canada, said the door was "still open to Britishers who come to Canada, with a little investment capital and work hard, and also to other desirable who will not become charges upon the community."

#### Mail Pouch Disappears

Boston, Mass.—Postal authorities here were notified that a mail pouch containing \$100,000 worth of cheques and securities which had been placed on a Boston-bound train in Lowell, had disappeared.

#### "WELSH WIZARD" ON REST CRUISE

With a solar tourist concealing the luxurious crop of hair for which he is noted, David Lloyd George, former Prime Minister of Great Britain and leader of the Liberal Party, is shown with his wife and their daughter, Megan, upon their arrival in Bombay, India. The wartime leader left England with his family, after the recent elections, for a tour in the East, on the advice of his physicians.

#### CRITICIZED BY PRESS

His Grace, Cosmo Lang, Archbishop of Canterbury, who has been severely criticized by the British press for the form of prayer which he has authorized for use on January 3rd, when the Church of England will hold annual intercession services.

### Mountie Has Narrow Escape

#### Shot Misses Constable's Heart By Narrow Margin

Aklavik, N.W.T.—The shot fired at Constable A. W. King, of the R.C.M.P., by a crazed trapper at a lonely cabin on the old Yukon trail, missed the constable's heart by a scant inch, a medical examination of King has revealed. The injured man, cared for by Dr. J. A. Urquhart in hospital, is recovering.

Meanwhile a patrol headed by Inspector James is pressing forward 80 miles to reach the Yukon trail cabin to arrest Albert Johnson, who is believed to be the demented man seen tampering with Indian trap lines and who is blamed for the shooting of the constable.

The wounded officer was placed on a sleigh by his companion, Constable R. G. McDowell, and brought to Aklavik.

### Give Wrong Impression

#### Newspaper Criticized On Attitude Towards Schools

Saskatoon, Sask.—Daily and weekly newspapers give the child the wrong "slant" on school life, according to Dr. S. R. Laycock, of Saskatchewan University. Newspapers comment in September on the fact that the child must give up his freedom on returning to the school which the papers give the atmosphere of a "prison" and similarly in June, they are "let out" from their mythical school prison. Dr. Laycock, lecturing to a class on school management, declared that newspapers should refrain from such adverse comment.

#### Back To The Land

Montreal, Que.—In the operation of its scheme for the return to the land of former farmers now living in the city and unemployed, the provincial department of colonization had placed 23,000 persons on the farm, or some 6,000 families, during the year 1923, according to a statement of Hon. Hector Laferte, Minister of Colonization and Fisheries.

#### Appointed Deputy Governor

London, England.—Sir George Ernest May, a director of the British Overseas Bank and well-known authority, has been appointed Deputy Governor of the Hudson's Bay Company in succession to Sir Frederick Richmond, who has resigned.

### Churchill Delivers Address

#### Praises Premier Bennett As a Man Of Vision

Nassau, Bahamas.—In his first public appearance since his recent accident in New York, Rt. Hon. Winston Churchill, M.P., former Chancellor of the Exchequer, was guest at dinner here of the executive council, the legislative council and the House of Assembly of the Bahamas. His excellency, the administrator, Hon. Charles Dundas, presided. Mr. Churchill showed facial evidence of his injury but appeared in vigorous health.

"The Bahamas should be the garden of Canada," Mr. Churchill stated in a brief address in which he recommended the closest relations with the Dominion. He praised Rt. Hon. R. B. Bennett, Prime Minister of Canada, as "a man of vision." The Empire will not fall to pieces. It is sound at heart and the workers of Britain have set themselves to keep it safe as of old," Mr. Churchill said.

### Japs Capture Port

#### Hulatao Is Taken By Japanese Without Resistance

Mukden, Manchuria.—The port of Hulatao, south of Chinchow on the Gulf of Liatunio, which Governor Chang Hsueh-Liang planned to turn into a great outlet for the products of Manchuria, was captured without resistance by the Japanese.

Japanese army headquarters explained the occupation was part of the campaign to suppress banditry in South Manchuria and that the larger question of the port's future must depend on negotiations in which the Mukden Government of Tsang Shih-Yi probably will be considered heir to the equity of Chang Hsueh-Liang who was deposed as governor of Manchuria by Japanese troops.

Already, however, influential Japanese are urging that Hulatao be included in the Japanese-controlled communications system for all Manchuria.

## STRONG STEPS TAKEN TO CURB UNREST IN INDIA

Bombay, India.—The Government's strict ordinances dealing with every phase of Nationalist activity are now in effect throughout all India.

New and sweeping special decrees, covering the whole Bombay presidency, including the Province of Sind, outlawed 500 Nationalist organizations, including Anti-Drink leagues, spinning schools and boys' boarding schools.

All citizens were warned they might be sentenced to two years of hard labor for peaceful picketing, persuading anyone not to pay taxes, boycotting British goods or public servants, or contributing funds to the Nationalist cause.

Other ordinances, operative in all India, empowered the authorities to fine children for Nationalist activities, the fines being collectable from their parents. Collective fines may be imposed on whole villages and towns.

The authorities may make arrests, raids and searches without warrants, or order the imprisonment of persons without trial. They may control public utility services, posts, telegraphs, railroads and steamships, and exercise the right of confiscation of property.

Banks, retail stores and insurance and shipping companies suffered a serious slump in trade. Nearly all Hindu stores, schools and colleges remained closed in mourning for the arrest of Mahatma Gandhi, the Nationalist leader.

As it has become a penal offence for newspapers to print Nationalist programs or any notices that might be construed as inciting, the congress followers adopted the method of writing their announcements, with chalk in huge letters on sidewalks, sides of buildings and other prominent places.

Groups of small boys have been employed by the Nationalists in many cities to parade the streets behind the congress flag and to shout such slogans as "Boycott British Goods," "Gandhi Government Is Here," and "Long Live the Revolution."

In his jail at Yeroda, Mahatma Gandhi continued to enjoy every courtesy, even being permitted contact with other Nationalist prisoners.

There were persistent rumors Gandhi and other leaders might be deported.

The Government may seize stocks of commodities from private citizens or corporations, compensating them at a price fixed by the Government. The publication of false rumors may be punished by a year's imprisonment.

## U. S. PROTESTS JAP OCCUPATION OF MANCHURIA

Washington, D.C.—In a broad invocation of United States treaty rights in the Far East, the United States served plain notice it cannot admit the legality of Japan's occupation of Manchuria, nor recognize any resulting regime impeding the open door policy, the nine-power treaty, or the Kellogg pact against war.

No official word forecast what actual steps might follow for the protection of U.S. interests. The terms of all of the international agreements invoked are vague with respect to penalties.

The apparent purpose was to marshal world indignation against any breakdown in the treaty structure protecting China, leaving further decisions to be made in the light of developments. Talk of immediate drastic action, including the rupture of diplomatic relations, have found no echo in official circles.

The U.S. notification, sent both to Japan and China, was made public by Secretary of State Henry L. Stimson without comment. It was said at the state department, however, that the United States had no dispute with Japan as to her legal rights in Manchuria, and no wish to intrude except as U.S. rights are affected or the anti-war treaty violated.

### Aviator Penalized

#### American Airman Fined For Illegal Entry Into Canada

Abbotsford, B.C.—Alvin E. Paulson, Seattle, Wash., aviator, arrested December 22, when his plane crashed while taking off at Sumas, was fined \$500 or three months imprisonment for illegal entry into Canada and failing to report to the proper authorities. He was returned to custody pending payment of the fine.

Two white men and three Chinese, one of whom was slightly injured when the plane crashed, were arrested with Paulson but subsequently were released when the white men were found to have no connection with the case and the Chinese had proved legal entrance to Canada. Paulson's five-passenger plane has been confiscated by the customs department.

### Canada Weathers Depression

#### Is In Admirable Position To Participate In First Material Advances

Toronto, Ont.—Canada is weathering the world-wide business depression in a favorable manner and will be in an admirable position to participate in the first material advance, Donald M. Marvin, economist of the Royal Bank of Canada, says in his monthly business review.

The review points to the strong position of precious metal production in Canada during the past year and to more favorable external trade conditions created through the new commercial treaty with Australia. At the same time it mentions the volume of export trade of the country has decreased by more than one-third during the past year.

### Challenge To Debate

#### Hon. Winston Churchill Would Meet Senator Borah On Soviet Question

New York, N.Y.—Rt. Hon. Winston Churchill, former Chancellor of the British Exchequer, has challenged Senator William E. Borah to a debate on whether Soviet Russia should be recognized by capitalist governments.

If the senator from Idaho accepts, he will be expected to defend the policy of Great Britain in recognizing the present Russian Government, while Mr. Churchill will defend the refusal of the United States to do so. Mr. Churchill will return to New York January 27.

#### Early Chicken Hatch

Sault Ste. Marie, Ont.—A hen belonging to Mrs. Robert Moreland of the Saulte has surpassed the feat of the Saulte, Ont., hen reported to have hatched six chicks in the open a few days ago. This hen, a barred rock, hatched nine chickens under the back porch of the Moreland home. The family is reported doing well.

#### Noted Aviator Is Killed

Miami, Fla.—Del. (Red) Jackson, co-holder of the world's endurance aeroplane record, was killed when an Amphibian plane he was stunting above the municipal airport fell approximately 2,000 feet to the ground.

## Big Hydro Developments

Hydro-Electric Installations In Canada During 1931 Greatly Increased

New hydro-electric installations brought into operation in 1931 totaled \$16,650 horse-power, and capital to the extent of \$110,000,000 is estimated to have been expended in providing for that development, according to a review of hydro activities in Canada for the past year, issued by Hon. T. G. Murphy, Minister of the Interior. The amount increased Canada's hydro-electric development to 6,666,000 horse-power, after allowing for several replacements of old by new turbines.

Additional to these, construction was advanced during the year on a number of projects, and it is expected these will add more than 1,400,000 horse-power to the Dominion water-power development in the next two or three years. More than \$250,000,000 will be required to bring these projects to completion.

Quebec led the Dominion in new installations with 382,200 horse-power. Figures for other provinces were British Columbia, 25,200 horse-power; Manitoba, 79,000 horse-power; Ontario, 58,200 horse-power; and Nova Scotia, 1,650 horse-power. Large undertakings are at present being constructed in Quebec, Ontario and British Columbia.

The various developments include: British Columbia—Fowell River Co., 24,800 horse-power on the Lois River; Ashcroft Water, Electric and Improvement Co., 400 horse-power on the Bonaparte River; the West Kootenay Power and Light Co., 57,000 horse-power at Corra Linn; the Bridge River Power Co., 55,500 horse-power.

Manitoba—North Western Power Co., three 37,500 horse-power units at Seven Sisters Falls; City of Winnipeg, two 12,000 horse-power units at Slave Falls.

### Sons Of Mexican President

Give Impressions Of Canada To Friends While On Visit To New York

Impressions of Canadian business enterprise, the hospitality of Canada's people and the rigors of an early winter in Montreal were brought to New York recently by the two sons of President Ortiz Rubio of Mexico, Fernando Ortiz Rubio and his brother, Guillermo, were guests of friends in New York during the holiday season. They are students at McGill University, Montreal, Fernando taking a course in civil engineering and Guillermo studying commerce.

Speaking fluent English, the brothers told the Canadian Press of their reactions since entering McGill three months ago.

To the keen, analytic mind of Fernando, the great Beauharnois power project was of paramount importance.

### Object To Tariff

Manchester Chamber Of Commerce Says Cotton Tariff Obstacle To Trade With Canada

The margin of tariff protection accorded to Canadian cotton mills by the Canadian Government is higher than necessary, according to the report of the home and overseas dominions section of the Manchester Chamber of Commerce presented at the annual meeting of the section.

The report declares the drop in British trade with Canada is due to three factors, the Canadian tariff, the development of Canadian industry, and competition with other countries. "The tariff has been and still is the greatest obstacle," the report says.

Pioneers who went to the Canadian West forty years ago are better authorities on hard times than a great many who read now.

"So you finally consented to teach your wife how to drive?"

"Yes, I need a new car anyhow."

"I enjoyed the seaside, but the food was awful."

"Why didn't you change your lodgings?"

"There was no point in that, my wife insisted on doing the cooking."

—Dorfbauer, Berlin.

W. N. U. 1924

### New Use For Electric Eye

Solves Problem Connected With Age Old Specimens At Ottawa

The electric eye has been enlisted to detect all sorts of things; from flaws in steel to poisonous liquor, but the National Museum of Canada has found a new use for it in classifying scientific specimens on which information is incomplete.

Museum officials first conceived the idea of using the electric eye when they were confronted with the task of classifying and cataloguing thousands of pre-historic stone age implements which they acquired from the European collections of the late Dr. H. M. Ami, former head of the Canadian School of Pre-historic in France.

Dr. Ami died before he could complete his cataloguing and his field notes were lost. The archaeologists of the museum were left with tons of stone weapons and tools and no data describing them. They knew what the implements were, but had no way of telling what part of Europe they came from.

It occurred to them that chemical analysis of the articles would tend to show to what geological area they belonged. But they could not conduct regular chemical analysis without destroying the implements.

The electric eye solved the problem. Under its ultra-violet rays, invisible to the human eye, various chemicals have distinctive colors, indistinguishable in ordinary light. The archaeologists knew in what years the specimens had been collected and they knew what areas Dr. Ami had covered during those years. It remained to compare the geological secrets of the stone implements revealed by the electric eye with the known geology of the areas in which the dead savant had worked.

Preliminary experiments were marked by success, and, though the work is slow and complex, the archaeologists are salvaging by degrees information which otherwise would have been lost forever.

### Takes Off Hat To Hogs

Saskatchewan Farmer Always Knows Where To Eat A Hundred Dollars

Not long ago a livestock truck pulled up to the unloading chute at one of the smaller abattoirs in Saskatchewan. The driver, a farmer of German extraction who for some years has been making a comfortable living out of mixed farming near Strassburg, unloaded a number of good bacon type hogs and called for the grader.

After having the load graded and weighed, the farmer asked to be given his cheque so as to do some shopping before leaving for home. The amount was slightly over one hundred dollars. As the farmer walked past the hogs at the way to the cashier's office the livestock buyer noticed that he stopped for a last look and finally lifted his hat to them as he left the pen.

In a joking manner the buyer asked the farmer why he did it. The reply contained some food for thought.

"Well," said the farmer, "I have been farming in my district now for a good many years. All that time I have kept a few sows and fed some hogs, and whenever I was 'stuck' for a hundred dollars I could always go to my pig pen and get the money. Many of my neighbors feel that they don't want to be bothered with hogs at the price they are, but they sure would like to have this money I am just going to get from you. I always will take off my hat to my hogs; they have helped me out of many a tight place, and I expect always to have some on my farm."

### Canada's Forest Lands

Forestry is the most profitable, if not the only use to which one-third of the land in Canada can be devoted, but this forest land has been, and will continue to be, one of the most valuable sources of wealth in the Dominion, according to the Forest Service of the Department of the Interior. Commercial forests can be grown on 555,000,000 acres, and on 182,000,000 acres the forests are either inaccessible or of value mainly for their ameliorating effect on climate, the control of water flow, prevention of erosion, or their scenic attractions.

### Gold Producing Provinces

Five provinces and the Yukon produced gold in 1930 as follows: Nova Scotia, 1,272 fine ounces; Quebec, 14,747 fine ounces; Ontario, 1,736,012 fine ounces; Manitoba, 23,189 fine ounces; British Columbia, 194,331 fine ounces, and the Yukon, 35,517 fine ounces.

Lions in captivity are said to grow better manes than those living in a wild state.

### TORONTO MAPLE LEAFS' STARE FORWARD

So far this season, Joe Primeau, Toronto Maple Leafs' star forward, is the best play-making forward in the League. With almost half the season mark reached, Joe has fourteen assists to his credit, or two more than "Hookey" Smith of the Maroons. Primeau is twenty-five years-old and weighs 153 pounds. He was the pivot man of the Maple Leafs' big line last season.

### Unique Charitable Scheme

Shriners Gather Tinfoil To Make Saleable Goods On Holiday Trade

If your Christmas presents included ash-trays, book ends or firedogs of metal it is quite possible that an old toothpaste tube or tinfoil from a package of cigarettes entered into their composition from the board of a Shriner in Toronto, Vancouver or Halifax.

In all parts of Canada, Shriners have for months past been saving up scraps of metal in furtherance of an unique charitable scheme. A foundry in Montreal has been busily engaged in melting down the metal and turning out various novelties suited to the Christmas trade. The money from their sale goes into a fund to establish a convalescent home in connection with the Shriners' Hospital for Crippled Children here.

The committee in charge of the project report an enthusiastic demand for the novelties. Aside from the public sale, several large banks and financial institutions have given the scheme support by placing wholesale orders. Striking evidence of the charitable spirit among fraternities was given by a large order for book-ends from the Knights of Columbus, who thus contributed to the Shriners' hospital fund.

### A Freak Egg

Saskatoon Hen Produces An Egg Within An Egg

A hen owned by R. B. McLeod, Saskatoon contractor and sportsman, produced an egg that deserves a niche in the "Believe it or Not" hall of fame. Mr. McLeod's white Leghorn produced an egg within an egg. The contractor made the discovery at supper when he chopped the head of a monster egg, more than twice as large as the usual daily offering on any ordinary hen.

A complete egg of normal size was inside. Shells of inner and outer eggs were normal.

Raspberries, strawberries and wild flowers are blooming out of season and any druggist could name people who are trying to do the same thing.

A composer, aged eighty, has written over three hundred church tunes. The chants of a life-time.

### Important Discovery

McGill University Announces New Treatment For Infantile Paralysis

Announcement of a discovery of far-reaching importance in the treatment of infantile paralysis was made at McGill University simultaneously with the reading of a paper by Dr. Maurice Brodie, a member of the McGill Department of Bacteriology, at the annual meeting of the society of American Bacteriologists at Baltimore.

Dr. Brodie, carrying out extensive research and experiment at McGill, has found in the blood of so-called normal adult individuals the same anti-bodies found in the blood of convalescing patients.

This discovery has led Dr. Brodie to the theory that practically every individual has been exposed at one time or another to the germs of infantile paralysis.

Serum has already been prepared from the blood of so-called normal adults and it is now practically assured that this serum has the same properties as serum made from convalescing patients and used in the treatment of infantile paralysis.

### Scientist Receives Award

Succeeds In Making Nerve Grow So That All Its Secrets Are Visible

The annual \$1,000 prize for an outstanding discovery was awarded by the American Association for the Advance of Science to Dr. Carl Casper Spidel, of the University of Virginia.

He is the first scientist to make a nerve grow so that all its secrets are visible from its "birth" to maturity. Dr. Spidel cleared up the doubt about how nerve grows. Some scientists had held that it developed like a "chain," others that it grew from a single tiny cell. But no one had been able actually to see.

Half of the world's tin production, it is said, is consumed in the United States, and by the appearance of some roadsides in summer the figure seems to be conservative.—Christian Science Monitor.

A new law compels farmers in Spain to keep all farm units in productive operation in order to reduce agricultural unemployment and to lessen import requirements.

### Surveys Canada's Position

Dominion the Fifth Greatest Trader In The World

In a survey of the economic position of Canada at the close of 1931, Hon. H. H. Stevens, Canadian Minister of Trade and Commerce, states that "Canada, on the basis of the figures for the last completed calendar year, is the fifth greatest trader in the world. In the absolute value of her external trade, she is surpassed only by the four greatest trading nations—the British Isles, the United States, Germany, and France, each with from four to twelve times the population of Canada. In total trade per head of population Canada achieved in 1931 a considerable lead over the British Isles and double the figure attained in the United States, Germany and France. Canadian exports of domestic produce in the calendar year 1930 amounted to \$89.17 per head of population as compared with \$60.50 per head of population in the United Kingdom. They were more than double the \$41.64 per head of Germany or the \$40.92 per head of France and nearly treble the \$30.82 of domestic products exported per head of population in the United States. No better evidence of the energy and efficiency of the Canadian exporter could possibly be adduced," emphasizes Mr. Stevens.

According to Mr. Stevens, in commenting on the prospects for 1932, "The great storm of depression would appear, so far as Canada is concerned, to have fairly well blown itself out. The price level, after a precipitate decline lasting over nearly two years, seems to be in a fair way to stabilization, and this should bring a return of confidence among business men and producers generally. The restoration of confidence should lead to a gradual increase of employment, a greater volume of production and an increase in the transportation of commodities."

Referring to the public finances of the Dominion, he states, "The most recent and most conclusive evidence of the financial stability of Canada in 1931 is the fact that after accepting the conversion of some \$650,000,000 of Dominion Government bonds to a lower rate of interest a few months ago, the people of Canada over-subscribed the new loan of \$150,000,000, offering the country some \$215,000,000 at the rate of five per cent. There could be no more impressive test of the confidence of Canadians in Canada."

### Wheat-Rye Hybrid

New Grain Can Be Grown On Relatively Poor Soils

Officials in the British Ministry of Agriculture evidenced interest in an announcement by the Cambridge University School of Agriculture that it had evolved a wheat-rye hybrid which, it claims, will give good quality grain in relatively poor soils at low cost of production.

The hybrid was produced under the supervision of Sir Rowland Biffen, whose "rust free" wheat, created in 1914, aroused wide interest. The university claims it can produce strains of the hybrid which can be satisfactorily cultivated on land not ordinarily used for wheat growing. Officials of the Ministry of Agriculture pointed out such a hybrid opens the possibility of using much poor land where ordinary varieties of wheat can not be grown.

### High Speed 'Planes

France Said To Be Developing 'Plane To Achieve Speed Of 500 Miles

For Hours Built in the greatest secrecy and working on an entirely new principle, a mystery 'plane has been built in France. This 'plane is expected to achieve amazing results. Speeds of 500 miles an hour are expected, and it is calculated that the machine will be able to reach a height of 15 miles or more. The pilot and the mechanic will be enclosed in an air-tight metal tank supplied with oxygen from reservoirs. They will thus be able to breathe normally at terrific speeds and at the highest altitudes. Italy, too, is said to be holding secret trials on Lake Garda.

### Canada In 1932 Eclipse Path

Total eclipse of the sun, such as that which will take place on August 31 next, always arouse very wide-spread interest both among the public at large and among professional astronomers, and the forthcoming one promises to be no exception to the rule. The Director of the Dominion Observatory, Department of the Interior, states that already preparations are in progress for two scientific expeditions from England which expect to locate somewhere in the belt of totality in Quebec; later there may of course be others.

## Bristish Columbia Lumber Trade

May Be Big Factor In Bringing Back Normal Conditions

That the lumber industry will play an important part and be one of the leaders in bringing Canada, and particularly British Columbia, out of the present industrial and economic depression, is the firm belief of British Columbia lumbermen.

British Columbia soft wood is becoming more and more popular in England. The London county council recently gave preference to Empire lumber in both its new housing schemes and its maintenance requisitions. Glasgow—second city in size and population in the United Kingdom—is also to give preference to Empire wood, and the highland capital of Inverness is considering a similar decision.

In the past the Old Country has taken only the cream of British Columbia lumber, but an effort is being made to sell her more No. 2 and No. 3 grades for scantling and house framing.

Owing to the new trade agreement between Canada and Australia, British Columbia lumber is gaining favor in Australia. British Columbia's share of Australia's lumber trade is now 75 per cent. Sawm lumber exports to Australia for the first nine months of this year compared with the corresponding period of 1930 show a substantial increase, all of which has been gained in the last three months. Lumber exports to Australia for July, August and September, 1931, were 20,188,558 board feet, while exports for the same period of previous year were only 8,107,717. This is a gain of 12,080,841 board feet.

British Columbia lumber is also being received with favor in China. Although this year figures to date are lower than last year, they are close to three times as large as figures for the corresponding period of 1929.

Egypt this year purchased some four million feet of British Columbia lumber which is about the same as the 1929 figure. Last year no lumber was exported to this country.

Practically all surplus stock of both cut and finished lumber has been used up.

Remarkably low prices at which lumber is now available will play an important part in the return to normalcy of the industry.

### International Aerial Pageant

Planned By Air League Of British Empire For Next Summer

An international aerial pageant, to bring 'planes from all sections of the world in competition, is planned by the Air League of the British Empire for mid-summer, but it is doubtful if Canada will be represented.

Preliminary plans, known at Ottawa, call for the pageant to be held at Heston aerodrome, near London, and for participation of both military and private 'planes, giving the manufacturers an opportunity to display their machines against the speedy craft developed under government aid. Many factors combine to bar the Dominion from having representation at the great international meet. Distance is a barrier and the financing of 'planes and pilots for the long journey overseas is another formidable factor.

### Waste Of Rust

Industry is mobilizing a number of metals and alloys in the chemists' war on the waste of rust. Chromium, copper, brass and other copper alloys and aluminum are substances whose industrial use, in part at least, has been augmented by the fight on rust. One of the major allies of the non-rust battlefield is nickel.

"Well, dad, I just looked in to say hello."

"Too late my boy. Your mother looked in to say hello, and got all my change."

The use of soy beans goes back to the beginning of China's agricultural age under Emperor Shen Nung.

"You can't marry my daughter, and might have spared yourself the trouble of coming to ask."

Oh, I had business in the house in any case.—Lustige Kölner Zeitung, Cologne.

## BONZO - - - By Studdy

ACID  
STOMACH

EXCESS acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. Harmless, and tasteless, and yet its action is quick. You will never rely on crude methods, once you learn how quickly this method acts. Be sure to get the genuine.

The ideal identifier for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth-paste that safeguards against acid-mouth. (Made in Canada.)

THE HOUSE OF  
DREAMS-COME-TRUE

of Par Vex," "The Lord  
Hodder & Stoughton, Ltd., London."

## CHAPTER X.—Continued

Hastening their pace, she and Nick skated up to the edge of the lake where Lady Latimer awaited them, and as he introduced the two women to each other it seemed as though the eyes of the woman on the bank asked hastily, almost frightenedly: "Will you prove friend or foe?" And Jean's eyes, all soft and luminous like every real woman's in the presence of love, signalled back steadily: "Friend!"

"Claire!" said Nick. And Jean thought that no name could have suited her better.

She was the slenderest thing, with about her the pliant, delicate grace of a harebell. Ash-blond hair, so fair that in some lights it looked silver rather than gold, framed the charming Greuze face. Only it was not quite a Greuze, Jean reflected. There was too much character in it—a certain gentle firmness, something curiously still and patient in the closing of the curved lips, and a deeper appeal than that of mere wondering youth in the gentian-blue eyes. They were woman's eyes, eyes out of which no weeping could quite wash the wisdom of some past or present sorrow.

"So you are one of the Charnwood Petersons?" said Lady Latimer in her soft, pretty voice. "You won't like

When  
TEETHING  
makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little bowels do their work of carrying off waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective, for older children, too. Remember, Castoria contains no harsh drugs, no narcotics—is absolutely harmless. When your baby is fretful with teething or a food upset, give a cleansing dose of Castoria. Be sure you get genuine Castoria with the name:

W. N. U. 1924

me, I'm afraid!"—smiling—"I'm living in your old home."

"Oh, Jean won't quarrel with you over that," put in Nick. "She's got a splendid castle all her own somewhere in the wilds of Europe."

"Yes, Beirnefels is really my home. I've never even seen Charnwood," smiled Jean. "But I should like to—some day, if you will ask me over."

"Oh, yes, certainly you must come," replied Lady Latimer a little breathlessly. But she seemed unaccountably hurried, as though Jean's suggestion in some way disquieted her.

"But of course, Charnwood—now—isn't a bit like what it must have been when the Petersons had it. I think a place changes with the people who inhabit it, don't you? I mean, their influence impresses itself on it. If they are good and happy people, you can feel it in the atmosphere of the place, and if they are people with bad and wicked thoughts, you feel that, too. I know I do. And there was no doubt in the mind of either of her hearers that she was referring to the last-named set of influences."

"But I think Charnwood must be lovely, since it's your home now," said Jean sincerely.

"Oh, yes—of course—it is my home now." Lady Latimer looked troubled. "But other people live—have lived there. It's changed hands several times, hasn't it, Nick?"—turning to him for confirmation.

Nick was frowning. He, too, appeared troubled.

"Of course it's changed hands—and—lots of times," he replied gruffly.

"But I should think your influence would be enough to counteract that of—of everybody else. Look here, chuck discharging rotten, psychic influences, Claire, and come on the ice."

"No, I can't," she replied hastily. "I haven't my skates here."

"That doesn't matter. We've a dozen pairs up at the house. One of them is sure to fit you. I'll go and collect a few."

He wheeled as though to cross the lake on his proposed errand, but Claire Latimer laid her hand quickly on his arm.

"No, no," she said. "I can't skate this morning. I'm on my way home."

"Oh, change your mind!" begged Jean, noticing with friendly amusement Nick's expression of discontent.

"No, really I can't," Claire's face had whitened and her big eyes sought Nick's in a kind of pathetic appeal.

"Adrian is not—very well today. My husband," said she explanatorily to Jean.

The latter was conscious of a sense of shock. She had quite imagined Lady Latimer to be a widow, and had been mentally engaged in weaving the most charming and happy-ever-after of romances since the moment she had seen that wonderful change come over Nick's face. Probably her impression was due to the manner of his first introduction of Claire's name. "A friend of our lives there—Lady Latimer," without reference to any husband lurking in the background.

She observed that Nick made no further effort to persuade Claire to remain, and after exchanging a few commonplace remarks the latter continued her way back to Charnwood.

It was so nearly lunch time that it did not seem worth while resuming the skating. Besides, with Claire Latimer's refusal to join them, the occupation seemed to have lost its charm, and when Jean suggested a return to the house Nick assented readily.

"She is very sweet—your Lady Latimer," remarked Jean, as they walked back over the frostily crisp turf. "But she looks rather sad. And she isn't the kind of person one associates with sadness. There's something so young and fresh about her; she makes one think of spring flowers."

Nick's face kindled.

"Yes, she's like that, isn't she?" he answered eagerly. "Like a pale gold and narcissus."

They walked on in silence for a few minutes, the thoughts of each of them dwelling on the woman who had just left them. Then Jean said softly:

"So that's the 'prior claim'?"

"Yes," he acknowledged simply.

"You never mentioned that she had a husband concealed somewhere. I quite thought she was a widow till she suddenly mentioned him."

"I never think of him as her husband—shortly. 'You can't mate light and darkness.'"

"I suppose he's an invalid?" ventured Jean.

Nick's face darkened.

"It's a drug fiend," he said in a low, hard voice.

"Oh!"

"After that one breathless exclamation of horror Jean remained silent. The swift thought conjured up before her eyes by Nick's terse speech was unspeakably revolting.

Years ago she had heard her father

## Take It Now

Keep strong the

Cod Liver Oil

Builds Resistance  
Easy to Take

describing the effect of the drug habit upon a friend of his own who had yielded to it. He had been telling her mother about it, characteristically oblivious of the presence of a child of eleven in the room at the time, and some of Glyn Peterson's poignant, illuminating phrases, punctuated by little, stricken murmurs of pity from Jacqueline, had impressed a painfully accurate picture on the plastic mind of childhood. Ever since then, drug-mania had represented to Jean the uttermost abyss.

And now, the vision of that slender, gracious woman, Nick's "pale gold narcissus," tied for life to a man who must ultimately become that which Glyn Peterson's friend had become, filled her with compassionate dismay.

It was easy enough, now, to comprehend Claire Latimer's curious lack of warmth when Jean expressed the hope that she might go over to Charnwood some day. It sprang from the nervous shrinking of a woman at the prospect of being driven to unveil before fresh eyes the secret misery and degradation of her life.

Nick was still silent as she and Nick re-entered the hall at Staple. It was empty, and as, by common consent, they instinctively drew toward the fire Nick pulled forward one of the big easy-chairs for her. Then he stood gloomily staring down into the leaping flames, much as Tormarin had stood the previous evening.

Intuitively she knew that he wanted to give her his confidence.

"Tell me about it, Nick," she said quietly.

"May I?" The words jerked out like a sigh of relief.

He dropped into a chair beside her. "There isn't much to tell you. Only, I'd like you to know—to be a pal to her, if you can, Jean."

He paused, then went on quickly: "They married her to him when she was hardly more than a child—barely seventeen. She's only nineteen now. Sir Adrian is practically a millionaire, and Claire's father and mother were in low water—trying to cut a dash in society on nothing a year. So—they sold Claire."

Sir Adrian paid their debts and agreed to make them a handsome allowance. And they let her go to him, knowing, then, that he had already begun to take drugs."

"How could they?" burst from Jean in a strangled whisper.

Nick nodded. His eyes, meeting hers, had lost their gay good humour and were dull and lack-lustre.

"Yes, you'd wonder how, wouldn't you?" he said. His voice rasped a little. "Still—they did it. Then, later on, the Latimers came to Charnwood, and Claire and I met. It didn't take long to love her—you can understand that, can't you?"

"Oh, Nick—yes! She is so altogether lovable."

"But understand this, too,"—and the sudden sternness that gripped his speech reminded her sharply of his brother—"we recognize that that is all there can ever be between us. Just the knowledge that we—love each other."

I think even that helps to make her life—more bearable."

He fell silent, and presently Jean stretched out a small, friendly hand.

"Thank you for telling me, Nick," she said. "Perhaps some day you'll be

...NIGHT

happy—together. You and Claire. It sounds a horrible thing to say—to count on—I know, but a man who takes drugs—"

Nick interrupted her with a short laugh.

"You needn't count on Latimer's snuffing out, if that's what you mean. He is an immensely strong man—like a piece of steel wire. It will take years for any drug to kill him. I sometimes think"—bitterly—"that it will kill Claire first."

(To Be Continued.)

## Gigantic Engineering Project

Work When Completed Will End Isolation Of Island Dwellers

On the western shore of Saint John Harbor workmen are toiling to complete a gigantic engineering project, ultra-modern in construction, and beyond the scope of any similar feat undertaken by man. A little community, scarcely changed since its early days as the nucleus of Saint John's civilization, exists a few feet from the scene of this waterfront activity. As they watch the progress made in work of excavation and construction, the little group of dwellers are wondering how long they will remain residence on the site occupied by generations of their families.

The engineering project, a coffer dam, bars the harbor waters and tides while piers are constructed within the protecting wall, eliminating submarine work. Earth and rock have been excavated to a depth of 35 feet below low water and 45 feet lower than high tide.

Huddling nearby is a tiny group of unpretentious dwellings. Their location is known as Navy Island. Since work on the dam started, the small, jutting area was given a land connection with the shoreline. Formerly it was an island, separated from shore by 20 yards of water.

Although Saint John had the origin of its settlement on Navy Island, as the islanders themselves continued its life apart from the city proper, the handful of residents sought its livelihood from the sea, and some came into the city only once or twice a year. Successive generations have continued the separate existence.

Now the barrier of water is removed. Modern facilities demand expansion. A little group of self-sufficient folk await the apparently inevitable termination to an existence as lived by their ancestors for generations back.

Miller's Worm Powders attack worms in the stomach and intestines at once, and no worm can come in contact with them and live. They also correct the unhealthy conditions in the digestive organs that invite and encourage worms, setting up reactions that are most beneficial to the system. A little group of self-tested their power in hundreds of cases and at all times are thoroughly trustworthy.

## Isolate Vitamin "D"

London Scientists Have Isolated Substance in Pure State

Dr. Robert Bourdillon announced recently that after months of experimenting at the National Institute for Medical Research he and a group of five London scientists had isolated a substance they believed to be pure vitamin "D."

"We have isolated a pure white crystalline substance which we have named calciferol and which we have every reason to believe is pure vitamin "D" in a purer state than has ever existed before."

Regarding the fact that vitamin "D" has long been known as a cure for rickets, Dr. Bourdillon said the importance of the discovery apart from its scientific merit was that the vitamin could now be administered in correct doses.

## Milk Probe At Calgary

The old question of the spread between what the farmer receives for his milk and what the consumer pays for it has come up again, this time in the city of Calgary, Alberta. Following a stormy session of the city council a board of investigation consisting of three aldermen was appointed to seek data from all over the continent as to costs of distribution, pasteurization, as compared to production, and retail costs. The question of whether the city milk supply will be pasteurized will be covered in the investigation. Around 300 people, chiefly opponents of compulsory pasteurization, crowded the council chamber during the course of the session.

Scotchman (struggling in the water)—Help! Help!

Man on shore—Shall I throw you a life preserver?

Scotchman—Hell, no. Get a derick. Ma roo-boot nearly sank, and if you donna hurry I'll ha' to sink with it.

Strong Position Maintained by  
The Royal Bank of Canada

Total Assets over 825 millions—Liquid Assets Stand at \$348,630,000—Profits of \$5,448,327 amply cover dividends and usual appropriations.

The maintenance of its usual strong position and ready ability to meet the rapidly changing trade conditions are among the outstanding features of the annual report of The Royal Bank of Canada. The statement, which is for the fiscal year to November 30th, is now going forward to shareholders. It will be immediately accepted as further striking proof of the successful manner in which Canadian banks are dealing with the problems brought about by depressed business conditions.

The general statement of assets and liabilities shows total assets in excess of \$825,000,000, a reduction of only about 7% as compared with the amount reported at the end of the previous year. In the light of lower commodity prices and general slackening of activity, the maintenance of total assets at such a high level should be regarded as a remarkably good showing. In keeping with its policy the Bank's liquid position, as usual, is a strong one, liquid assets totalling \$348,630,551, over 43% of liabilities to the public.

The principal accounts included among them are cash items of \$100,286,891; Dominion and Provincial Government securities of \$85,473,058 and Canadian Municipal and British foreign and colonial public securities of \$24,641,816. Total loans total \$76,293,389 and naturally represent a substantial reduction for the year, those in Canada being down \$15,847,995, or

33%, and those abroad over \$7,000,000.

The generally lessened business activity is further reflected in commercial loans, which are \$419,345,043, as compared with \$444,816,577 a year ago. Letters of Credit also show a reduction—nearly \$10,000,000—obviously due to curtailed international trade.

Total deposits stand at \$647,303,675 as against \$695,589,080 at the end of the 1930 year. The decline, as is well known, has been principally in deposits elsewhere than in Canada, those in the Dominion being down only \$7,160,200, and now amount to \$479,165,064, as against \$486,325,264.

## Satisfactory Profits

The many shareholders of the Bank will be particularly interested in the Profit and Loss account and the showing made should be regarded as very satisfactory. Profits for the year amounted to \$5,448,327, and these added to the amount brought forward from the preceding year brought the total available for distribution up to \$9,555,105. Payment of the usual 12% dividend absorbed \$4,200,000; a contribution of \$200,000 was made to Officers' Pension Fund; the usual amount of \$400,000 was appropriated for Bank premises and \$600,000 was set aside for Dominion Government taxes. After meeting all these charges the substantial amount of \$4,155,105 was carried forward to credit of Profit and Loss into the next fiscal year.

## Natural Resources Question

Joint Royal Commission To Be Appointed To Deal With Matter

The government will shortly take steps to clean up the natural resources question as it affects Alberta and Saskatchewan.

A joint royal commission will be appointed to determine what further sums of money, if any, these provinces are entitled to receive in compensation for the alienation of resources during the period of federal control. The personnel of the commission is now under discussion at Ottawa and at the provincial capitals, and an announcement is expected shortly.

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple but strong remedy—Mother Graves' Worm Exterminator.

## For Tired Hikers

Some benevolent person, many years ago, provided a number of Traveller's Rests which may be seen in Southern Lancashire and in Cheshire, England.

They are stone seats set up by the wayside, and bear the inscription "Traveller's Rest." In addition they have the words "Look from this to more lasting rest above." One may be seen near Lymn, and another on the Chester Road a few miles west of Warrington.

Japan is aiding its poultry raisers.

## Little Helps For This Week

"Not every one that saith unto me, Lord, Lord, shall enter into the Kingdom of Heaven; but he that doeth the will of my Father which is in heaven."—Matthew vii. 21.

"What shall I do to be forever known? Thy duty ever; Thus did all many who yet slept unknown."

Oh! never, never Thinkst thou perchance that they remain alone.

Whom thou know'st not? By angel trumpets in heaven their praise is blown.

Divine their lot! "What shall I do to gain eternal life?" Discharge aright

The simple duties with which each day is rife.

Yea, with thy might, Ere perfect scheme of action thou devise.

Will life be led, While he who ever acts as conscious cries

Shall live, though dead." —Friedrich von Schiller.

Ask God to show you your duty, and then do that duty well; and from that point you mount to the very peak of vision.—Edward Everett Hale.

On mules, we find two legs behind And two we find before; We stand behind, before we find What the two behind be for.

Japan is aiding its poultry raisers.

## NEURALGIA

THE agonizing aches from neuralgia can be quieted in the same way you would end a headache. Take some Aspirin tablets. Take enough to bring complete relief. Aspirin can't hurt anybody.

Men and women bent with rheumatism will find the same wonderful comfort in these tablets. They aren't just for headaches or colds! Read the proven directions covering a dozen other uses; neuritis, sciatica, lumbago; muscular pains.

Cold, damp days which penetrate to the very bones have lost their terror for those who carry Aspirin tablets with them! All drug stores, in the familiar little box:

(Made in Canada)

## The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

### Heard Around Town

The Ladies' Aid met at the home of Mrs. Lloyd Robinson on Tuesday afternoon, Mesdames Robinson and Murray being joint hostesses. The president, Mrs. Lee, presided. Mrs. ... the secretary-treasurer, read the minutes of last meeting which were approved. Three tenners were received for the position of janitor for the church when it was decided to give it to Wesley Gilbertson. At the close a dainty lunch was served. The next meeting will be held at the home of Mrs. Lee. Mesdames Lee and Nicholson being joint hostesses.

On Saturday this district had another nice snow storm, but on Monday morning along came a Chinook wind which gave us a half day of spring like weather. However, it suddenly changed into a slight rain followed by a 50 mile wind storm from the west with a sudden drop in temperature. Wednesday night it registered 27 below zero.

All executive officers, board of directors and members of the Chinook Chamber of Commerce are requested to attend next Monday evening's meeting as it will be used exclusively for making up the new by-laws.

### CARD OF THANKS

Mr. Fred Otto wishes to thank all those who supported, by their votes and influence, in electing him trustee for the Bison district for the Consolidated School, Chinook.

### Taxation Ideas Must be Revised

The conference in Alberta this week, at which the financial situation of the prairie provinces and of the leading Alberta cities was discussed, are indicative of the prevailing difficulties in public financing. For the time being, at any rate, there must be a radical revision of ideas in government financing. The old easy, irresponsible days are over for some time. It is no longer possible to meet maturing obligations by further borrowing in New York, and it may be that the sudden check on the insatiable and extravagant costs of government will prove highly beneficial in the long run.

It is apparent that considerations of taxation must assume an altered form. There is a limit to increases in taxation as there is a limit to public borrowing. For the first time in a careless decade, the individual taxpayer, urban and rural, is scrutinizing government's closely. The old laxity of concern in the extent to which he is being taxed has disappeared. He is looking for administrative economy and will insist upon it. The old conception of taxation generally has been associated with land values and with industrial and commercial profits, but these have largely disappeared. This led to artificial valuation of land, commodities and securities, which can no longer be sustained. Speculative prices as a basis for assessment are out.

## Black on White

Alberta's new 1932 auto license plates, with black figures on white background, will be the only "black on white" licenses on the continent, with the single exception of Alabama plates, according to the lists of official license plate colors for North America.

### Here and There

In 1930 the Canadian Pacific Railway paid out in taxes in Canada \$7,447,606 and for the year 1931 the taxes will run over \$7,500,000. This brings the company's total tax payments in Canada from its incorporation to date to more than \$121,000,000.

Jim London, world heavyweight wrestling champion, on a recent trip into the New Brunswick woods, bagged a black bear, weighing 500 lbs. The animal, wounded by two shots, charged London who dropped his rifle and resorted to a knife with which he killed the bear.

Nova Scotia is coming into its own as a holiday province. In 1931 more than a quarter of a million tourists visited the province, the largest number of summer visitors in its history, according to records by Hon. P. C. Black, provincial Minister of Highways.

To have joined the Canadian Pacific Railway at the time of its organization in 1881 and in the last seven years to have examined more men for promotion to engineer rank than any other employee of the company, is the outstanding record of Albin Mayne, of Toronto, who has just retired from the position of Route Examiner for the Motive Power Department at Montreal.

The Brookville Recorder in a recent editorial urges all Canadians who are figuring on holidaying outside the Dominion this winter to consider the advantages of British Columbia where the Canadian dollar stands at par and where the climate is as equal of any to be found in the United States. Great Britain, the editorial adds, has set the example for Britshers which Canadians should be patriotic enough to follow.

The high reputation of Canada for the pacific settlement of disputes with foreign powers is a well known fact. As a result of the influence in the councils of the League of Nations and indicates that the Dominion should play an important part in the coming disarmament conference at London. Says Colonel David Carnegie, C. B. E., noted lecturer on the problems of peace, who has just returned from Great Britain, "Canada should be patriotic enough to follow the Duchesse of Richmond."

Beginning their first Canadian tour, the ski team of the University of Oxford and Cambridge, arriving at Halifax by Canadian Pacific steamship Montreal, went on via Montreal to Lacerte-In-Quebec and from there went to St. Marguerite in the Laurentians where they will contest against each other and with Canadian universities. The teams were welcomed at the Windsor station, Montreal, by Lord Dunsany, son of the Governor-General, himself an under-graduate of Cambridge University.

of the question today.

Until recently, the government based its taxation and financed on the supposition that Alberta's crop of 130,000,000 bushels of wheat will bring in over a dollar a bushel. There is no dollar price for wheat today, and even out of the current low price, the wheat grower has to pay freight rates, elevator charges, insurance, etc. The amount of new capital thus brought into the province is away below the former financing estimates. The government cannot sell its bonds on any basis of new wealth, not substantiated by hard facts.

The present economic situation will eventually force the adoption of a scientific method of assessment as a basis for taxation. This will resolve the problem down to the elementary question of how much money, not speculative prices of land and the infinity of our natural resources, but how much actual cash the people have in their pockets and in bank accounts out of which may be extracted the amount required to run the government, with due consideration for the carrying on of productive enterprises, rural and urban.

## School Grants May be Slashed

Regina, January 9.—An economy movement in connection with schools in western provinces is believed imminent, with information that the recent Edmonton inter-provincial conference discussed a proposal to reduce the school year from 200 to 180 days.

That school grants will be reduced has been expected for some time, in view of information given out recently by Hon. J. T. Anderson, minister of education, and the reduction of the length of the school year, it is expected, would mean that the grant could be increased to a less extent than otherwise. The proposed reduction in the school year would not necessarily affect the length of time which schools would remain open, but merely the number of days for which the government will in future pay the grant, it is expected.

The province now makes a grant of \$2.50 per day for high school rooms in cities on the basis of 200 days or a maximum of \$500, a grant of 50 cents per room per day for the public schools, and in the high schools the grant is \$1.50 per day for rooms of city students and \$2.50 per day per room for rooms of non residents.

In places where there are three-roomed or four-roomed high schools, such as Alberta towns, the province makes a grant of \$3.00 per room per day. The grant to rural and village schools is 90 cents per room per day.

### Point New Heads to C.P.R. Departments

The Pacific Railway Telegraph Department has with the New Year changed in name to the Department of Communications having supervision over the telegraph, telephone and radio broadcasting services of the railway. To the head of the new department Mr. W. D. Neil is appointed as general manager, vice Mr. John McMillan, retired, and Mr. H. H. Goodfellow takes the position of assistant general manager.

W. D. Neil

Mr. Neil joined the service of the Canadian Pacific Railway as an operator at Calgary in 1905, thus rising from the ranks to the highest post in the gift of his department. His first ten years of service were spent in the West and in 1915 he came as superintendent of traffic to Montreal. In 1922 he became assistant manager eastern

lines and in 1924 assistant manager western lines. Since 1930 he was assistant general manager of the department and now is promoted chief.

Mr. McMillan became a construction foreman with the Canadian Pacific in 1888 and passed through various grades of promotion in the West until March 1915 when he was promoted manager of Telegraphs at Montreal. He has been general manager, Canadian Pacific

John McMillan

Telegraphs since 1921 from which position he now retires. Mr. Goodfellow started with the Canadian Pacific as an operator in 1899 at Vancouver and has been in the West during all his service except for a year in Montreal as traffic superintendent. He had been in Vancouver as super-
